▲ For each period of your capped call, ½ hour for "½ Hour Chat", calls are charged at our standard rates until the "price cap" is reached. Charging recommences after each price cap. Does not include calls to or from mobile phones. If the cost of your call is less than the price cap, your call is charged at our normal standard rates.

* The savings are based on call charges only (excludes service and equipment charges) and is against your most recent telephone bill from your previous service provider and must be against the same type of service on "standard rates" (i.e. not cap or special discounted plans, prepaid, phone card or VoIP) published on respective website and for the same type and minutes of calls.

This is a discount on total invoice charge.
